

SUKINO HEALTHCARE — INSULIN PRESCRIPTION & SLIDING SCALE

Patient: Lakshmi Narayanan, 54 F | UHID: SK-47765

Date: 20 March 2026 | Consultant: Dr. R. Bhat, MD (Endocrinology)

Diagnosis: Type 2 Diabetes Mellitus with poor oral control, HbA1c 10.1%

Rx

1. Inj. Human Mixtard 30/70 — 14 units SUBCUTANEOUS, 30 min before breakfast.
2. Inj. Human Mixtard 30/70 — 8 units SUBCUTANEOUS, 30 min before dinner.
3. Tab. Metformin 500 mg — twice daily after food.

Correctional (sliding) scale, pre-meal capillary glucose:

- < 70 mg/dL : withhold, give 15 g oral glucose, recheck in 15 min
180-250 : + 2 units regular insulin
251-350 : + 4 units regular insulin
> 350 : + 6 units and inform physician

Nursing notes:

- Rotate injection sites (abdomen, thigh, upper arm); document site each time.
- Store opened pens below 30 degrees C, discard after 28 days.
- Educate on hypoglycaemia: sweating, tremor, confusion — treat immediately.
