

SUKINO HEALTHCARE — DISCHARGE SUMMARY (TRANSITION CARE)

Patient: Govind Rao, 69 M | UHID: SK-40873
Admitted: 20 Feb 2026 | Discharged: 14 March 2026
Unit: Neuro Rehabilitation | Consultant: Dr. M. Iyer, DM (Neurology)

Diagnosis: Left middle cerebral artery infarct with right hemiparesis and mild expressive aphasia.

Hospital course:

Thrombolysed at the referring hospital within window, transferred for rehabilitation. Received physiotherapy twice daily, occupational therapy and speech therapy five days a week. Power improved from 2/5 to 4/5 in the right upper limb and 4+/5 in the right lower limb. Swallow assessment cleared for soft diet on day 9. No aspiration episodes.

Discharge medications:

- Tab. Aspirin 75 mg — once daily after lunch, continue.
- Tab. Clopidogrel 75 mg — once daily after lunch x 21 days, then stop.
- Tab. Atorvastatin 40 mg — once daily at bedtime, continue.
- Tab. Telmisartan 40 mg — once daily in the morning.

Care plan at home:

- Home physiotherapy 45 minutes daily; speech therapy twice weekly.
- Fall precautions: grab bars in bathroom, non-slip footwear, night light.
- Soft diet, upright at 90 degrees during meals and 30 minutes after.
- BP log twice daily. Follow-up neurology OPD on 28 March 2026.
