

SUKINO HEALTHCARE — DISCHARGE SUMMARY

Patient: Anil Kumar, 72 M | UHID: SK-38210

Admitted: 26 Feb 2026 | Discharged: 4 March 2026

Ward: Transition Care Unit | Consultant: Dr. S. Rao, MD

Reason for admission: Community-acquired pneumonia with acute exacerbation of COPD.

Hospital course:

Treated with IV Piperacillin-Tazobactam 4.5 g Q8H for 5 days, nebulised Ipratropium + Levosalbutamol Q6H, and oral Prednisolone 30 mg OD tapered over 5 days. Oxygen saturation improved from 88% on room air to 95%. Chest physiotherapy twice daily. Mobilised with walker from day 4.

Discharge medications:

- Tab. Cefuroxime 500 mg — twice daily x 5 days
- Nebulisation Ipratropium + Levosalbutamol — three times daily x 7 days
- Tab. Pantoprazole 40 mg — once daily before breakfast x 7 days

Care plan at home:

- Monitor SpO2 twice daily; report readings below 92%.
- Continue breathing exercises 10 minutes, three times a day.
- Soft high-protein diet; 1.5 L fluid per day.
- Follow-up in pulmonology OPD on 11 March 2026.
