

SUKINO HEALTHCARE — POST-OPERATIVE ORDERS

Patient: Joseph Mathew, 68 M | UHID: SK-49221

Surgery: Right total knee replacement, 15 March 2026

Consultant: Dr. V. Reddy, MS (Ortho)

Rx

1. Tab. Paracetamol 1 g — ORALLY, every 8 hours, fixed, 5 days.
2. Tab. Etoricoxib 90 mg — ORALLY, ONCE DAILY after food, 3 days.
3. Tab. Pantoprazole 40 mg — ORALLY, ONCE DAILY before breakfast, 7 days.
4. Inj. Enoxaparin 40 mg — SUBCUTANEOUS, ONCE DAILY at 8 PM, 10 days (DVT prophylaxis).
5. Tab. Tramadol 50 mg — SOS for breakthrough pain, max twice daily.

Nursing notes:

- Score pain 0-10 every 4 hours; escalate if score > 6 after fixed analgesia.
- Ice pack over the knee 15 minutes, four times a day.
- Ankle pumps hourly while awake; assisted walking from post-op day 1.
- Inspect dressing daily for soakage; report calf pain or swelling.
